To Whom It May Concern:

My name is Brenda Miles and I am the Leadership Team Leader of Bless My Home Ministries and the True Light Family Resource Center Liaison. We have been in business for 2 years helping the homeless transition into home by providing furniture and household goods to make their houses into homes. To date we have helped 80 clients. They are treated with respect and dignity as we encourage and build them up by setting up homes, they can be proud of. This is accomplished through donors sharing out of their abundance through generosity and love.

To manage our donors and clients we contacted SBS to build a database to track our clients and suppliers. Prior to embarking on this project, we managed everything on hard copy. SBS built a database that maintained our color theme, which we really liked, and brought all our client data into one location. We now have access to our client information at the click of a button and reporting to easily produce client records in different formats.

SBS works effectively and efficiently. She responded to questions and issues very quickly which was very helpful for us. I am so excited about using this database because we now have the tool, we need to make our jobs easy and service my clients more efficiently. The price is right, and the work is excellent. I would recommend SBS to any business that needs a database for reporting and data collection.

SBS will be an extremely positive addition to your organization.

Sincerely,

Brenda Miles
Leadership Team Leader
